Professional Summary

Mobile App Developer (Flutter) with a background in Computers and Information from Zagazig University. Experienced in building cross-platform applications, integrating RESTful APIs, and managing state using Cubit. Skilled in Firebase, Supabase, payment gateways, and Google Maps. Looking to apply development skills in a challenging environment to deliver high-quality, user-centric mobile solutions.

Technical Skills

- **Frameworks & Tools:** Flutter, Dart, Cubit (State Management)
- **Backend & Services:** Firebase (Auth, Firestore), Supabase, RESTful APIs
- **Integrations:** Google Maps SDK, Payment Gateways (Stripe)
- **Version Control:** Git, GitHub
- **Concepts:** OOP, Clean Architecture

Projects

E-commerce App

- Built a full-featured shopping application with cart, checkout, and order history.
- Integrated a third-party payment gateway (e.g., Stripe/PayMob) for secure transactions.
- Used Firebase Authentication and Firestore for user data and real-time product updates.
- Consumed RESTful APIs for product catalog and inventory management.

Training App

- Developed a course management application with video progress tracking and user dashboard.
- Implemented Cubit for predictable and scalable state management across the app.
- Connected to backend services (Supabase) to fetch real-time course content and store user progress.
- Designed a responsive UI that works seamlessly on multiple screen sizes.

Education

Bachelor of Computers and Information – Zagazig University (2024)

Certifications

National Telecommunication Institute (NTI) – Mobile Application Development using Flutter (2026)

Languages

- Arabic: Native
- English: Professional Working Proficiency (B2 / Upper-Intermediate)
